

MedAction

Integrated Workflow Management for Medication Optimization

XchangePoint's acute care platform provides integrated workflow management of bedside delivery of discharge medications, bedside consultation and pharmacy-led medication reconciliation

■ **Operationalize "meds to beds" workflow**

- ▶ Proactively identify and target at-risk patients at time of admission
- ▶ Accommodate expansive, hospital-wide workflow needs
- ▶ Utilize accurate, real-time worklists to serve as a dynamic monitoring and documentation platform for pharmacy staff

■ **Provide complete and accurate pharmacy-led medication reconciliation**

MedLink

- ▶ Vast data coverage of medication fill history and improved sig frequency rates
- ▶ Intuitive user interface with clean look and feel
- ▶ *MedIndex* medication adherence scorecard provides six months of medication fill and refill history, along with key adherence metrics

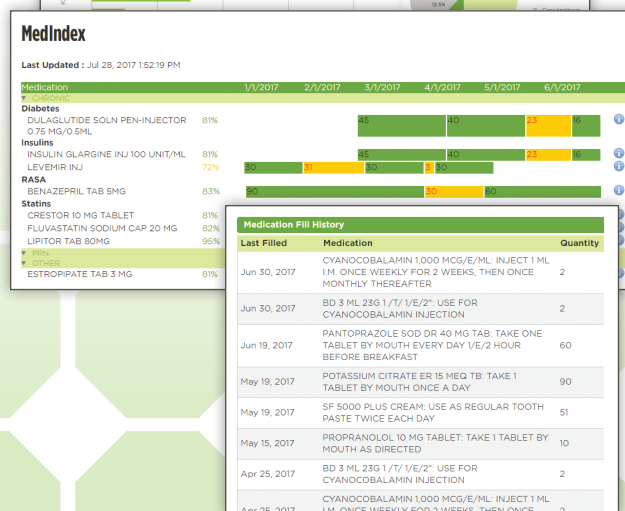

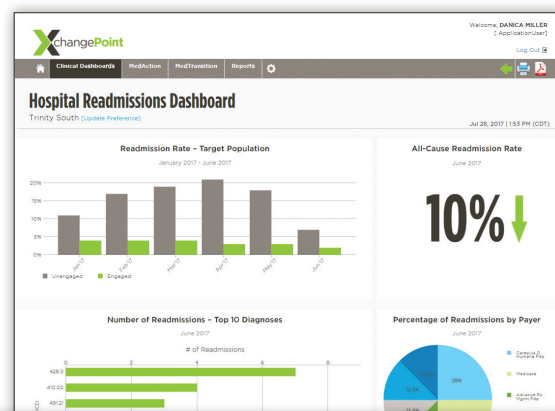

■ **Offer customized discharge medication instructions**

RxGuide

- ▶ Patient education tool simplifies the process of understanding how to safely and accurately take discharge medications
- ▶ Materials written on a fifth to eighth grade reading level, and available in more than 20 languages

XCP Analyze

- ▶ Business intelligence and operational reporting provides strategic data to drive results within the health system
