

# MedTransition

Integrated Workflow Management for Transitions of Care

## XchangePoint's post-acute care platform operationalizes transition care management and post-discharge medication reconciliation

### ■ Prioritize high risk patient population

- ▶ Readmission risk analysis tool identifies and prioritizes patients with targeted alerts
- ▶ Worklists serve as a monitoring and documentation platform for pharmacy staff to provide patient outreach within hours to days of hospital discharge
- ▶ Various, customizable post-discharge outreach assessments support extended care coordination
- ▶ Clinical escalation features allow high-risk patients to be seamlessly reassigned to appropriate care team members

### ■ Provide complete and accurate pharmacy-led medication reconciliation

#### MedLink

- ▶ Automated history of medications in post-discharge setting identifies patients who did not secure discharge medications
- ▶ Vast data coverage of medication fill history and improved sig frequency rates

- ▶ *MedIndex* medication adherence scorecard provides six months of medication fill and refill history, along with key adherence metrics

### ■ XCP Analyze

- ▶ Business intelligence and operational reporting provides strategic data to drive results within the health system
